EXPERIENCE

Aimfinity Designs Web Developer

Edmonton, Alberta
June 2024 - Present

- Leveraged modern web technologies (HTML5, CSS3, JavaScript, React) to develop engaging websites with intuitive user experiences and visually appealing aesthetics.
- Partnered closely with clients to gather and analyze requirements, translating them into visually stunning website designs that aligned with their brand identity and business goals, consistently achieving high levels of client satisfaction.
- Proactively identified and resolved critical technical issues across diverse website platforms, ensuring uninterrupted website performance and preventing potential revenue loss due to downtime.

PROJECTS

Enid Unity, C#

<https://store.steampowered.com/app/2376470/Enid/>

Implemented robust version control using Git, establishing a CI/CD pipeline that streamlined development and ensured efficient, automated build and deployment processes. Led regular code review sessions to maintain high code quality and adherence to coding standards, while championing Incremental Delivery by consistently delivering playable builds for timely feedback. Ensured software robustness through rigorous C# testing practices, including thorough unit and integration testing.

Money Tracker Express.js, Node.js, MongoDB, React

<https://github.com/evanderaimufua/moneytracker>

Engineered a MERN stack-based money tracking application to empower users to effectively manage their finances. Implemented seamless CRUD (Create, Read, Update, Delete) functionality for financial transactions, leveraging MongoDB for data storage, Express.js for API endpoints, React.js for a user-friendly frontend, and Node.js for server-side scripting.

Album Finder React, Node.js, Javascript, CSS, Bootstrap

<https://github.com/evanderaimufua/spotifyapi>

Spearheaded the development of a Spotify-inspired album discovery platform, taking ownership of both frontend and backend implementation. Successfully integrated the Spotify API using React.js for a dynamic frontend and Node.js for a robust backend, while leveraging CSS to create an engaging user interface. Demonstrated a deep understanding of the Spotify API, honed skills in making API calls, and mastered data exchange between diverse platforms.

Casi React Native, Typescript, Docker, MySQL

<https://github.com/evanderaimufua/CASI>

Developed a cross-platform mobile application using React Native for vet clinics to streamline quarterly survey completion and submission, resulting in increased participation rates and data collection efficiency. Integrated features such as secure login, survey creation/completion, and reminder notifications while adhering to test-driven development and object-oriented programming best practices

EDUCATION

University of Saskatchewan

Bachelor of Science Applied Computing

Saskatoon, Saskatchewan

September 2019 - June 2024

EXTRACURRICULAR

UX Collective - Vice President

September 2023 - April 2024

As a strategic initiator and skilled collaborator, I spearheaded the university's inaugural Design-A-Thon, demonstrating meticulous planning and flawless execution. I forged a strategic partnership with 88 Gallery/525art, culminating in Pixel.Palette, a groundbreaking showcase of student-created websites, solidifying my reputation as a bridge-builder between academia and the art world. Further amplifying my commitment to empowering others, I initiated and led transformative workshops, equipping aspiring creatives with the tools and knowledge to excel in design thinking, prototyping, and impactful presentations.
